

C O N T E N T S

<i>R. Chapko, I. Gavrilyuk, O. Khimich, V. Khlobystov, M. Kutniv,</i>	
<i>I. Lukovskyy, P. Matus, H. Shynkarenko, S. Solodky, D. Sytnyk, A. Timokha,</i>	
<i>V. Vasylyk and L. Yanovich</i>	
Outstanding ukrainian mathematician (to the 80th anniversary of the birth of the academician V.L. Makarov) .....	3
<i>I. K. Argyros, S. M. Shakhno and H. P. Yarmola</i>	
A unified local convergence study of multistep algorithms .....	7
<i>A. V. Beshley</i>	
On the numerical integration of singular double integrals using Green's theorem .....	17
<i>I. V. Borachok</i>	
On the method of fundamental solutions for the time dependent Dirichlet problems .....	33
<i>A. S. Chernikova and A. M. Nedashkovska</i>	
Solving systems of nonlinear equations with matrix continued fractions ..	45
<i>I. I. Demkiv and Ya. O. Baranetskiy</i>	
On the approximation of Urysohn operator on a symmetrical interval with Bernstein-type operator polynomials .....	57
<i>I. I. Dyyak, Ya. G. Savula and Yu. I. Turchyn</i>	
Verification of the high accuracy scheme to solve advection-diffusion- reaction problems .....	66
<i>A. R. Hlova, S. V. Litynskyi, Yu. A. Muzychuk and A. O. Muzychuk</i>	
On solution of the initial-value problem for homogeneous wave equation with dynamic boundary condition in weighted Lebesgue spaces .....	76
<i>N. V. Mayko and V. L. Ryabichev</i>	
The weighted error estimate of the finite-difference scheme for a second-order partial differential equation with a mixed derivative .....	99
<i>Y. V. Semenova and S. G. Solodky</i>	
Error bounds for Fourier-Legendre truncation method in numerical differentiation .....	113
<i>Yu. M. Sybil</i>	
Integral equation method for boundary value problems in multiply connected domains for the two-dimensional Laplace equation .....	131
